Rob,

This is the latest from the district.

1. One well (Pace "Newberry-Gibson" 8) that was previously being evaluated is slated for shut-in on Oct. 15.
2. One well (Macpherson "WD-2) was reevaluated to be providing WF sweep in the HC zone, hence for a later compliance date on 2017.

Some of well status of the yellow-highlighted wells have also been updated.

There is still 1 well being evaluated (light orange). The operator has submitted additional information.
